DISTILLED LIQUORS STORED AMOUNT TO 5,000 GALLONS liquors stored in this state, regardless of all privately owned stocks, according to the report of Commissioner of Internal Revenue Daniel, C. Roper, who is in communication with the house ways and means committee, at Washington, with respect to government relief for holders of warehouse receipts.

ment relief for holders of warehouse receipts.

The Connecticut figure represents only a drop in the bucket, when contrasted with the total of nearly 76,000,000 gallons which Commissioner Roper says are stored in twenty states; but in these days when one remembers the latest price for whiskey in Connecticut was 25 cents an ounce, or \$8 a gallon, the 5,000 gallons look like a lot.

Approximately \$20,00,000 is tied up in bank loans on stocks in warehouses, according to the revenue commissioner. Paper amounting to \$1,554,000 on bills of lading and warehouse receipts covering liquor and \$7,324,000 on national bank loans to corporations dealing in distilled liquors was outlying at the last bank call. These loans do not include credits extended by state or private banks.

Commissioner Roper suggests two alternatives for graffing government relief to holders of warehouse receipts. The first is that the government take physical possession of all liquors, issue treasury certificates of indebtedness in payment, concerntrate the liquors at certain points where they could be economically guarded and create a monopoly for distribution. The other method is that the treasure department might be granted as mal appropriations for safeguarding liquors in the present warehouses and relieve the golders from carrying charges.
